

African boxthorn control and biocontrol field day

Come along to our upcoming field day in Warren to look at the new release of a novel rust fungus for the biocontrol of African boxthorn. Also, there will be representatives from LLS talking about toxic weeds and fire ants.

Topics include:

- African boxthorn control – Ben Gooden - CSIRO
- Red Imported Fire Ants Awareness and Emergency Management - Tristan Cameron, LLS
- Toxic weeds for livestock – Danielle Plummer, District Vet LLS

A field walk is also included to see release of the African boxthorn biocontrol.

Attendees can register interest on the day in receiving the biocontrol agent for release on their own land.
